To assemble tape measure you will need scissors, a stapler and a few minutes! Print this PDF on standard 8.5" x 11" paper at 100% with no print scaling. Cut the measuring tape out on the solid black lines. Be sure not to cut the tape into separate strips, you should end up with one long S shaped strip. Mountain fold on the horizontal dotted lines (ex: fold strip with 12, 13, and 14 under the top strip with 7, 8 & 9). Valley fold on the vertical dotted lines (bringing 10, 11 & 12 in line with 8 & 9). This will create a half inch overlap at each turn. Use the circles for alignment. Staple at folds, where noted. This will create a measuring tape nearly 7 feet long!
